

USA food labelling & composition

11 October 2017

Programme

08.45 *Registration & refreshments*

09.00 **Course welcome & introduction**

An introduction to the course together with a brief group exercise to gauge delegates' knowledge.

09.30 **USA regulatory bodies**

Learn about the various regulatory agencies involved in both the regulation and enforcement of food sold in the USA.

10.00 **Additives, GRAS substances, flavourings**

Understand how the USA authorities regulate substances as ingredients and in the manufacture of food. Our experts will guide you on how to apply this knowledge to food product formulation compliance checks.

11.00 *Refreshments*

11.15 **General food labelling requirements**

Gain an insight into the main mandatory information which needs to be on the labels of food products marketed in the USA.

12.15 **Workshop 1**

12.45 *Lunch*

13.45 **Additional labelling considerations with claims**

Completing the pre-lunch labelling session, this talk provides further information on additional USA labelling requirements for specific products such as irradiated food, bioengineered food and dietary supplements.

14.30 **Nutrition labelling**

Addresses the labelling regulations published in 2016. Considers the rules for displaying the USA Nutrition Facts Panel, including how to determine the serving size, formatting and presentation on food labels.

15.00 *Refreshments and Workshop 2*

15.45 **Information in the internet age**

Where to find and how to use the most recent regulations and regulatory guidance.

16.15 *Close*
